Dear Friends,

Thank you for considering Dark Star Lighting & Production. Whether you are a new customer or a long time partner, we welcome the opportunity to help with your current project.

In 15 years, we have grown from a small consulting firm with an office in the corner of my family home to a full service design, production, and rental house in our own 10,000 square foot facility. We have built a strong team of skilled professionals, while the personal touch of a small firm remains as I continue to over-see daily operations and thoroughly enjoy my work.

The cornerstone of our business has been the intimate relationships we have built with our diverse clientele, the kind we hope to build with you. Dark Star will always strive to provide you with top quality design and technical services while maintaining superior customer service. For us, ensuring the success of your show or venue is a matter of pride. We believe that every event should be highlighted, that every event is a special event.

We look forward to hearing about your next project.

With Best Wishes,

Michael Sorce, President
